PROTECTIVE INDUSTRIAL PRODUCTS

Through Innovative Technologies
MaxiFlex®
Ultimate™

- Ultra-lightweight, knitwrist, Micro-Foam nitrile coated glove.
- AirTech® technology delivers 360° Breathability.
- Optimized, controlled grip through our micro-cup finish.
- Minimal palm thickness and thinner than most comparable gloves.
- Class leading form, fit and feel, reducing hand fatigue and increasing comfort.

MaxiFlex®
Endurance™

- Ultra-lightweight, knitwrist, Micro-Foam nitrile coated glove.
- Raised Micro Dots to increase durability and cushioning.
- AirTech® technology delivers 360° Breathability.
- 25% thinner than most comparable gloves.
- Class leading form, fit and feel, reducing hand fatigue and increasing comfort.

MaxiFlex® Active™

- Ultra-lightweight, knitwrist, Micro-Foam nitrile glove.
- Micro-encapsulated specialized ingredients, which include vitamin E and aloe vera, deliver a ‘well being effect’ while you work.
- AirTech® technology delivers 360° Breathability.
- Minimal palm thickness and thinner than most comparable gloves.
- Class leading form, fit and feel, reducing hand fatigue and increasing comfort.

MaxiFlex® Comfort™

- Ultra-lightweight, knitwrist, Micro-Foam nitrile glove.
- High grade, soft cotton liner delivers increased levels of comfort and assists in “Sweat Management”.
- AirTech® technology delivers 360° Breathability.
- Class leading form, fit and feel, reducing hand fatigue and increasing comfort.

MaxiDry®

- Ultra lightweight, nitrile coated glove.
- General purpose assembly requiring precision handling.
- Superior grip in oily and wet environments.
- Excellent dexterity due to strategic placement of coating.
- Locking cuff prevents the glove from slipping; elasticated wrist support provides snug fit.

MaxiDry® Plus

- Ultra lightweight, nitrile coated gauntlet.
- Liquid repellent (EN374-2 Low level chemical resistance).
- Superior grip in oily and wet environments.
- Excellent dexterity due to strategic placement of coating.
- Locking cuff prevents the glove from slipping; elasticated wrist support provides snug fit.

MaxiChem®

- Ultra lightweight, nitrile coated gauntlet.
- Chemical Resistant (EN374-3 AKL).
- Superior grip in oily and wet environments.
- Excellent dexterity due to strategic placement of coating.
- Tailored cuff provides excellent fit, comfort and sensitivity.

MaxiCut® 3

- Lightweight, cut-resistant, Micro-Foam nitrile coated glove.
- EN388 level 3 cut resistance, ANSI level 2.
- High performance yarns and fibers promote cut protection in addition to high levels of comfort.
- Reinforcement between thumb and forefinger increases product life.

**Applications**: Handling ceramics, corrugated sheets, non-deburred parts, glass panels, plastics injection, moulds, sharp-edged metal sheets, small sharp components. Logistics and warehousing. Maintenance. Primary, secondary and final assembly.

MaxiCut® 5

- Lightweight, cut-resistant, Micro-Foam nitrile coated glove.
- EN388 level 5 cut resistance, ANSI level 4.
- High performance yarns and fibers promote cut protection in addition to high levels of comfort.
- Reinforcement between thumb and forefinger increases product life.

**Applications**: Handling ceramics, corrugated sheets, non-deburred parts, glass panels, plastics injection, moulds, sharp-edged metal sheets, small sharp components. Logistics and warehousing. Maintenance. Primary, secondary and final assembly.

ATG® Technology Platforms

- **360° breathability** - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.
- **Heat dissipates** - naturally, via a network of micro tunnels in the coating.
- **Cool hands** - are happier, safer and more productive.

- **25% thinner** - than most foam nitrile gloves on the market whilst offering twice the mechanical performance.
- **Twice the durability** - when compared to other polyurethane and foamed nitrile gloves on the market.
- **Form, fit and feel** - mimics the “hand at rest”, reducing hand fatigue and increasing comfort.
- **Consistent liner penetration** - from the nitrile coating, leaving only the soft liner resting against the skin.
- **Latest knitting technology** - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

- **Innovative fibres** - we source our base ingredients to develop our own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.
- **Reinforcement** - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

- **Optimized grip** - delivered through our micro-cup finish, allows for a controlled grip in dry/oily environments.
- **Reduced hand fatigue** - our micro-cup finish reduces hand fatigue associated with lack of a proper grip.
- **Dexterity and flexibility** - are maximized because the coating is applied only where it is needed.

- **Liquid repellence** - we have increased resistance to oils via our LiquiTech® technology platform.
- **High grade chemical resistance** - is available through our LiquiTech® platform, without the normally associated loss of comfort and dexterity normally found in chemical resistant gloves.
- **Safeguard your hands** - LiquiTech® can offer protection from many liquids, including water, oils and many chemicals, commonly present in the workplace.

**HandCare®** technology can be seen in the MaxiFlex® Active™ range: millions of micro encapsulated specialized ingredients are stored in the liner of the glove which progressively open during wear, delivering their contents. This process cools, refreshes and vitalizes the hand with Vitamin E and Aloe Vera.

Our **Hand Care®** technology also eliminates all traces of processing residues via an unrivalled approach, to ensure that the skin will not become contaminated. To guarantee this, ALL of our gloves are certified to Oeko-Tex 100® which is a recognized international standard guaranteeing that the glove is ‘skin friendly’.

The **Sanitized®** (triclosan free) hygiene function acts like a built-in deodorant that keeps clothing fresh longer and leaves you feeling safe and protected.

All components and ingredients used in the manufacturing and construction of ATG® products have been assessed and comply with the **R.E.A.C.H.** European Directive, EC # 1907/2006 (Registration, Evaluation, Authorisation and Restriction of Chemicals).
